Prefix Systems was established in 1996 and has grown to become one of the UK'S leading conservatory roof system manufacturers, offering a wide variety of roofing solutions to suit almost any situation. We have built our business on providing all our customers with first class levels of service, both before and after sales, which sets us apart from other conservatory roofing fabricators.

All roofs are manufactured in our 20,000 sq. ft. unit which has a capacity to produce in excess of 100 roofs per week, this means that when demand is high our quality standards will not diminish. Prefix Systems was one of the first conservatory roofing fabricators to achieve BBA approval, this means when your company orders a conservatory roof from Prefix Systems you can be safe in the knowledge that your conservatory roof has been manufactured to the highest quality standards and using the finest materials available.

To ensure a 'right first time' installation, every roof is fabricated in our factory to exact specifications, all our saws are automated providing assurance that all components are machined to the correct specification every time. Our roofs are built with the installers in mind, we go as far as possible during the manufacturing process to guarantee a swift and hassle free installation, we can arrange for you to visit our premises in order to see at first hand what Prefix can offer your company.

We offer a full range of back up services from providing CAD and detailed base plans to on site surveys for the more complex designs. Prefix can provide technical assistance with the initial quote enquiry which will 'iron out' any problems and lead to a hassle free ordering process. Our lead times on all our roofs are tailored to suit individual customer requirements so if your business requires a quick turnaround on any style of roof Prefix has the solution. All our industry experienced staff are on hand to advise on any queries you or your colleagues may have, no matter how obscure your design may be, Prefix Systems has the solution.

Prefix Systems offer design of their roofs to BS6399. This standard uses more onerous wind loadings and takes the altitude and location into account. The design is postcode specific and categorises the location - urban, rural or coastal. This ensures that the conservatory roofs supplied by Prefix Systems are structurally proven.

systems

Classic Victorian Systems

The classic Victorian systems from Prefix has set the standards in conservatory roofing from design through to installation offering the flexibility, structural stability and aesthetics that are required to satisfy the requirements of customers and consumers today.

Elevation Roofing System

The next generation of low pitch roofing solutions. Elevation and elevation plus bring a new and unique contemporary interpretation to the lean to roof, with 'click lock' boltless technology elevation is a dream to install as it easily clicks together.

Portal framed roofs

Portal frames are used in a variety of situations including walkways, glazed atria, swimming pool enclosures and often provide answers to difficult site problems. Prefix will, if required, provide support at all stages of the project from the initial site survey, through production of foundation and working drawings to on site assistance during the installation.

Uzone

With it's unique and innovative click lock technology, the zone roofing systems can boast 75% fewer installation steps, this means the overall installation is completed quicker resulting in time saved on site.

Ancillaries

Prefix continually invest in developing and supplying new products that are unique and innovative.
